WELCOME TO AH PRIME

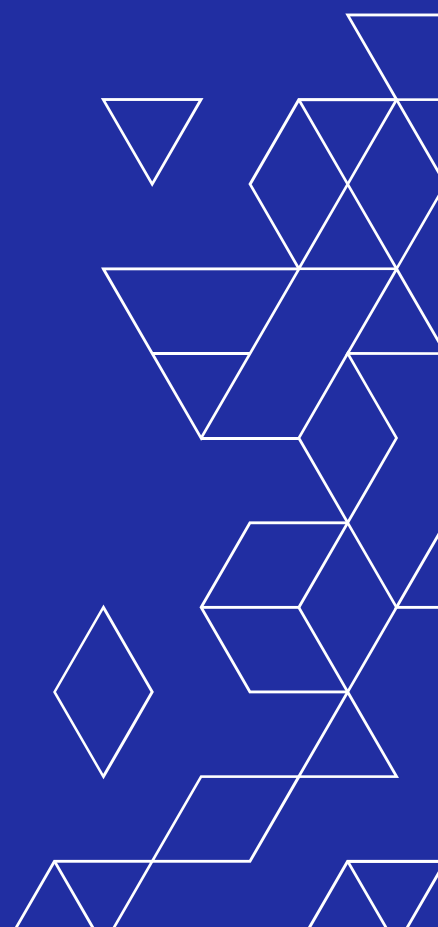

AH Prime is a Saudi general contracting establishment providing reliable execution for infrastructure, road, pipeline, utility and building works.

We support residential, commercial and operational projects through organized site work, practical solutions, and a clear commitment to quality, safety and timely delivery.

Our goal is to be a dependable partner for clients who need professional contracting services built on trust and proper execution.

AH

PRIME

VISION & MISSION

Vision

To be a trusted contracting partner in Saudi Arabia, recognized for reliable infrastructure and construction works that meet client expectations and support sustainable development.

Mission

To deliver road, pipeline, utility and general contracting services through skilled teams, clear planning, safe practices and consistent follow-up from site preparation to final handover.

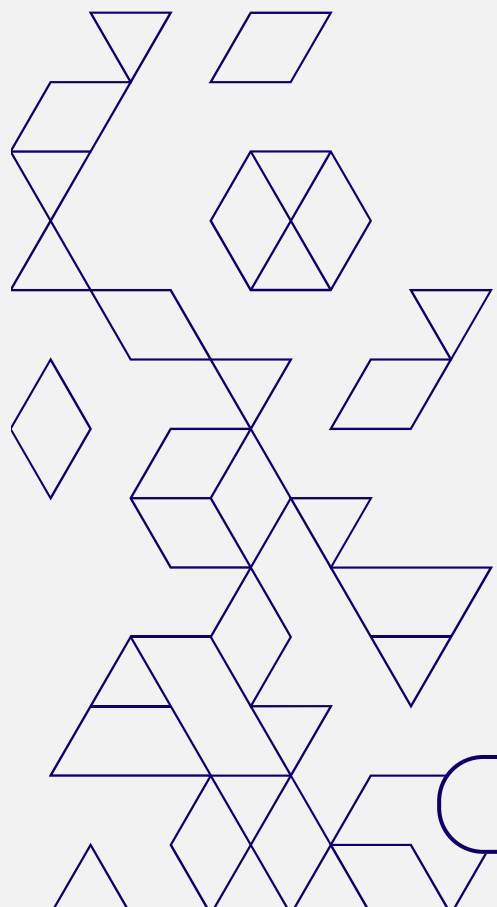

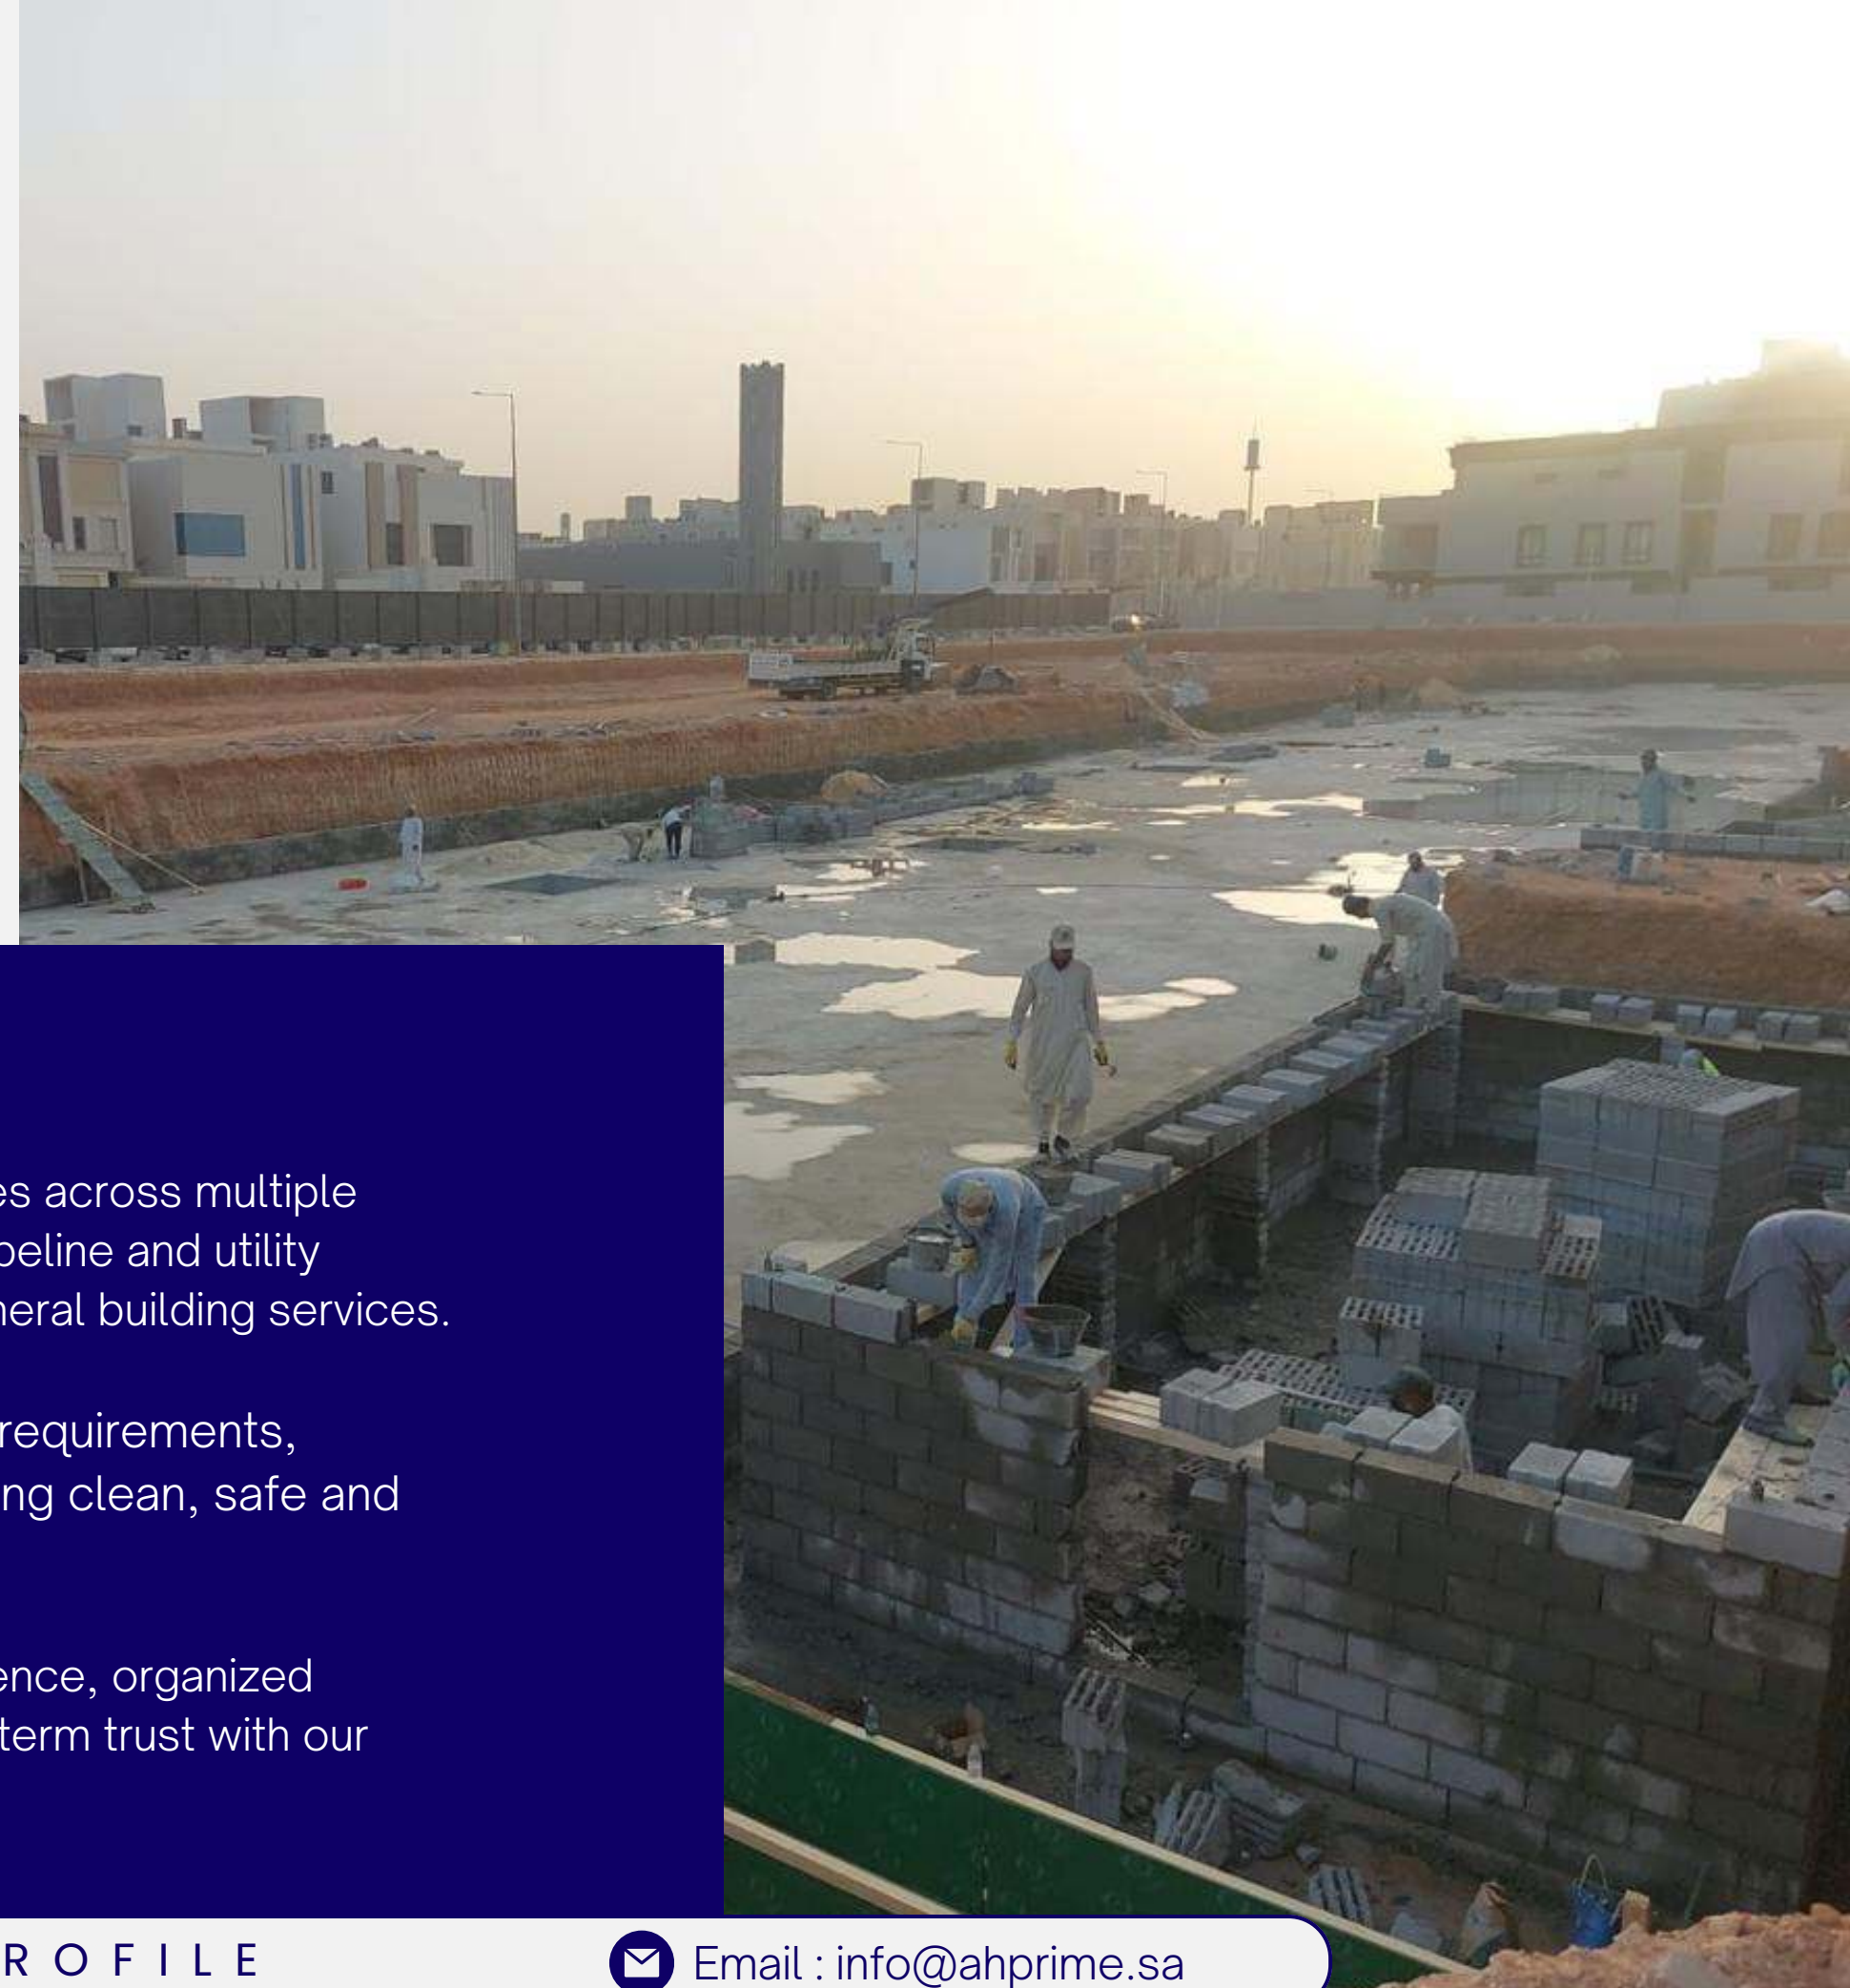

ABOUT AH PRIME

Company Overview

AH Prime provides general contracting services across multiple construction scopes, including road works, pipeline and utility works, site preparation, maintenance, and general building services.

We focus on understanding each project's requirements, coordinating the work properly, and delivering clean, safe and reliable results.

Our approach combines practical field experience, organized execution and a commitment to building long-term trust with our clients.

OUR CAPABILITIES

AH Prime is capable of handling different contracting requirements based on project needs, from infrastructure and external works to building construction and maintenance support.

Infrastructure Works

Roads, site access, excavation support, external works and related civil works.

General Contracting Works

Building construction, renovation, maintenance, finishing and site preparation services.

OUR APPROACH

AH PROFILE

1

Planning

We review the project scope, site conditions, required materials and execution requirements before starting the work.

2

Execution

We coordinate labor, equipment and materials to carry out the work safely, efficiently and according to the agreed scope.

3

Handover

We follow up on finishing, inspection and final delivery to ensure the work is completed properly.
